KP5/NP3VI Desecheo Island -update January 14 by Steve N2AJ

On Monday, January 12, 2026 the Desecheo DXpedition Deployment Team successfully completed the installation of both Remote Deployment Units (RDU's) on Desecheo Island. The RDU's, solar arrays, battery systems, antennas, Starlink internet terminal, and monitoring equipment are now fully deployed and operational.

All work was carried out efficiently and in strict compliance with U.S. Fish & Wildlife Service requirements, ensuring an environmentally responsible operation. With the infrastructure in place, the team departed the island and returned safely to the mainland, marking a major milestone for the project and the beginning of something new.

Desecheo DXpedition 2026 will change how DXpeditions can be conducted at environmentally sensitive locations now and for the future. <https://desecheo2026.com/kp5/>

KP5/NP3VI Desecheo Island -update January 14 2000z by Steve N2AJ

Adjustments Being Made To Systems. Please be patient, this is only Day Two of a planned 30-day activation.

This DXpedition represents a completely new operating concept designed specifically for environmentally sensitive, highly regulated, and restricted locations. As with any first-of-its-kind effort, refinements are ongoing. Our team leaders, along with electrical and software engineers, are actively fine-tuning operating schedules, band and mode selection, RF power levels, and overall system performance to optimize results as conditions evolve.

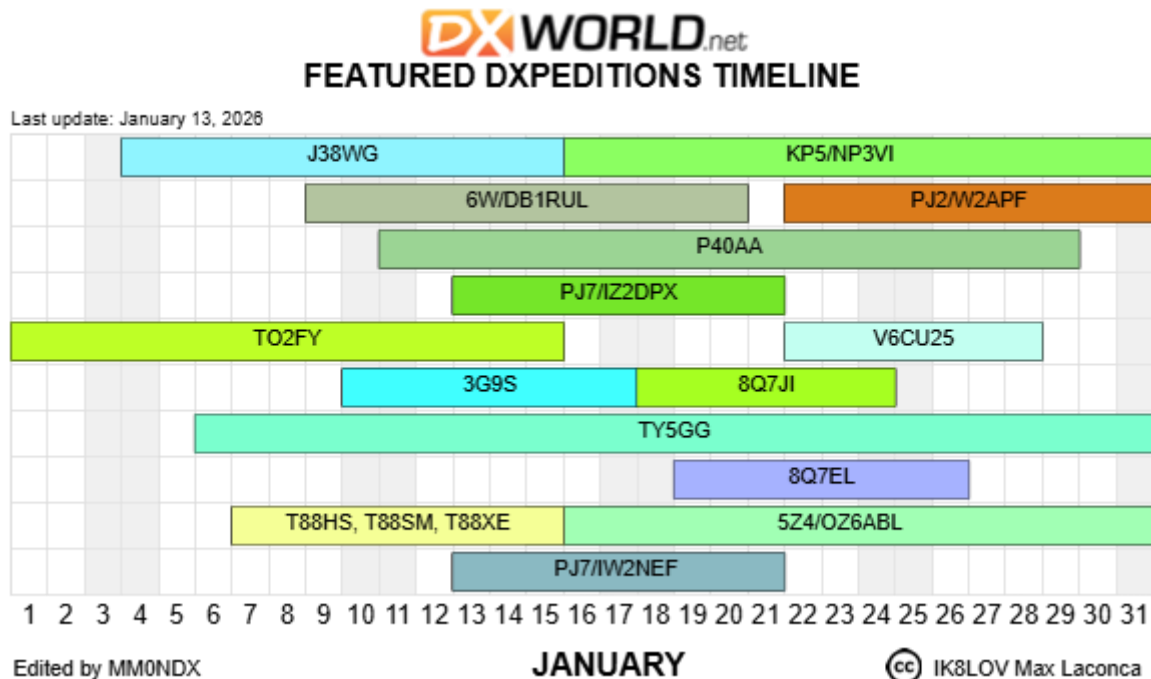

Due to Desecheo's geographic location, North American stations are currently dominating propagation. That said, our operators have been explicitly instructed to listen for DX stations and to give them priority whenever possible in order to broaden log coverage. We ask for your patience as we work through the pileups and strive to put as many stations as possible into the log.

AU7RS Lakshadweep Island -update January 13 by Sarath VU2RS

I am writing to provide an update on our progress and the current status of equipment shipments. We are pleased to inform you that the shipment from Germany, including the additional taxes, has finally reached Kochi. However, the Dx Commander shipment is still held by customs. They have requested numerous documents, which we are providing promptly, and we hope to have this cleared within the week. Due to these delays in receiving materials and the subsequent need to ship everything to Agatti, it is unlikely we will be able to proceed as originally planned this week. Consequently, we have sent an email to the WPC to request an extension of our license until February 13, 2025. This extension will provide us with the necessary time to include foreign reciprocal operators in the team, finalize the island selection, and complete the transfer of all materials. This buffer ensures that, even with further complications, we will have enough time to be on the island for a minimum of 8 to 10 days of operation. <https://www.dx-world.net/au7rs-lakshadweep-islands/>

9N, NEPAL Jan, DL4XT mentions: 'Activity planned in summer 2026! This is my biggest DXpedition planned so far. I got a verbal agreement on the callsign 9N7XT, but this isn't confirmed yet, so it might still change.' Operation from 160 to 10 metres using CW, SSB and FT8 with a FT-891 100W. <https://yct.janlabs.de/dx/nepal2026>

C2, NAURU Phil, FK1TS/C21TS will be back on air starting around January 31, 2026 until end July 2026. Phil mentions 'It's been great fun working everyone. And I keep promising but never deliver, but for sure some SSB next year. I need to get myself a good headset so I can be hands free and then good to go. It's also very noisy here. I live right next to the main road with no air con so windows always open. March / April should still bring some good contacts. SSB contacts will be barefoot. Legal limit here for CW / FT8 etc is 105 watts, SSB 400 watts. My licence good to the end of 2026.

As stated below I will finish for good towards the end of July '26 when my 3 years is up. So still

some time to catch me. My logs up to date with Charles M0OXO. Any queries hit me up on email. LoTW, eQSL, HRDlog, Club Log all up to date. 99% of LoTW queries are non-uploads at the other end.'

Update December 30 by Frank F8DVD

Andrew, **KC4/KL5SE** arrived two days ago at Mt Newall Camp. He has been active a few times on 14242, and will be at the camp until January 10th.

His working conditions: FT-710 with 100W into a dipole. It's the very 1st ham radio activity from that remote place. Thanks Andrew for that!

Mt Newall is a radio repeater station to relay data from a seismic array in the Wright Valley to McMurdo Station. It also powers VHF voice repeaters to support activities in the area.

Coordinates: 77° 50'S , 162° 62' W Grid RB12hl.

Vostok base by Alex UG1A

After Vostok, says Frank (F8DVD), there's a possibility that Alex will go to Ridge B and operate from there. Nothing is certain about that yet so more info later. However, it would be an ATNO for

the Worldwide Antarctic Program (WAP) and Polar DX Challenge as Ridge B has never been activated before.

A new callsign have been assigned to Alex for all operations during this season: RI1ANI.

Since 2007, Alex was very active from Progress and Vostok base, mostly in CW but also in SSB with many calls such as R1ANC, R1ANP, RI1ANC, RI1ANV, RI30ANT.

NOTE: Ridge B is one of the least studied areas in Antarctica but has been considered to be a potential location for the oldest ice on Earth. In January 2020, the first scientific traverse from Russia's Vostok Station to the topographical dome of Ridge B was carried out. Ridge B (Dome B) is 3807m above sea level, 79.02°S, 93.69°E).
